OUR MISSION

Our mission is to make the world a better place by growing wealth through sustainable investing.

INVESTMENT OBJECTIVE

The portfolio seeks long-term capital appreciation by investing primarily in a focused portfolio of small and micro-size company common stocks with market capitalizations generally below \$1.5 billion at time of purchase. The strategy attempts to identify risk and/or opportunities through integrating environmental, social, and governance (ESG) analysis into our investment process. For diversification purposes, the strategy will generally limit sector weightings to no more than 30% of its respective benchmark, the Russell 2000 Index.

- Returns presented are time-weighted returns. Valuations are computed and performance is reported in US dollars. Net returns are impacted by timing of receipt of fee payments. Fees are due quarterly in arrears, however failure to receive payment in a timely manner may result in a higher net return for that particular period.
- Gross-of-fees returns are presented before management and custodial fees but after all transaction costs. Composite and benchmark returns are presented gross of non-reclaimable withholding taxes. Net-of-fees returns are calculated using the actual account fee. The management fee for the Riverwater Micro Opportunities portfolio is 1.00% .
- A list of composites, policies for valuing investments, calculating performance, and preparing GIPS reports are available upon request.
- The composite was created in July 2019 and the inception date is July 31, 2018.
- Internal dispersion is calculated using the equal-weighted standard deviation of annual gross returns of those portfolios that were included in the composite for the entire year. The composite requires more than 5 accounts to calculate this metric.
- The three-year annualized standard deviation measures the variability of the composite gross returns and the benchmark returns over the preceding 36-month period.
- Since inception, portfolios are removed from the composite if they have a significant cash flow. A significant cash flow is defined as a contribution or withdrawal greater than 20% of the beginning market value of a portfolio. The portfolio is removed from the composite for the month in which the significant cash flow occurred.
